Ms. ALLENSON

Umea, Sweden

Diabetes patient

About & Family:

Mrs. Allenson lives alone in her small flat. She was never married and has no living family members. She has financial difficulties and cannot take care of herself alone anymore. She receives nursing care at home and meals on wheels. Limitations/Difficulties in walking for 100 meters climbing up stairs, kneeling, stooping, crouching, pulling or pushing large objects, lifting or carrying weights more than five kilos, dressing, including shoes and socks, bathing or showering, preparing a hot meal, doing work around the house

Diseases	Symptoms
stroke,	heart trouble,
arthritis, rheumatism	n, fear of falling down,
osteoporosis	intestine problems,
	incontinence

Health

A couple of years ago Mrs. Allenson had a stroke and this year needed an operation on her hip because of fractured bones due to osteoporosis. Without the help of her nurses, she would not be able to keep going, since she has a very bad memory and poor cognitive functions. Her muscles are weak and she is afraid of falling down; therefore she spends her time at home and inactive.

	Psychographics	Drug
