About & Family:

Mrs. Isola has lived alone in her small flat ever since her husband died. Her son visits her a couple of times a week to check if she is doing well or needs anything. She has some financial problems.

Limitations/Difficulties in

climbing up stairs,
kneeling, stooping, crouching,
pulling or pushing large objects,
sleeping

Health

Mrs. Isola has no diseases aside from high cholesterol. She takes pills and has to keep a strict diet. She has a good memory but poor cognitive function. She cannot cope with numbers, loses orientation and acts slowly. Because she is very overweight she has some mobility limitations and has sleeping problems.

Diseases
